Intelligent Pick & Place System

This system is designed to precisely pick and place precision lens, inspect lens' surface cosmetic defects using our in-house developed AOI, and output the good lens into wafer format tray or other types of tray for downstream process.

Features and Benefits

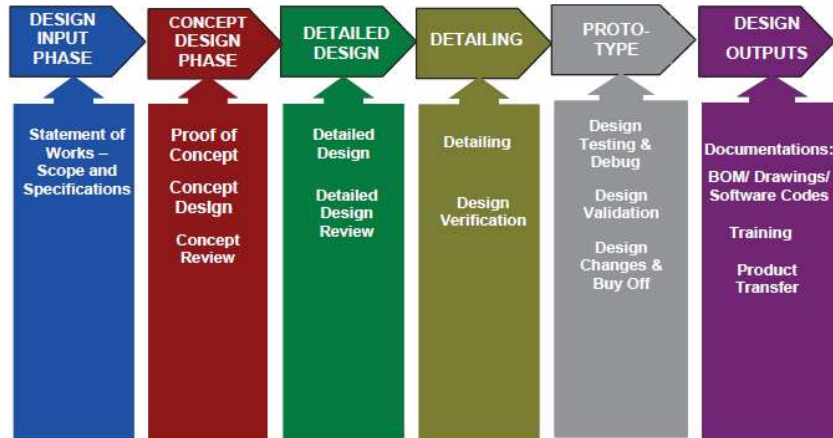

- Productivity improvement
- Reduction of number of operators
- Able to meet up to Class 1K Cleanroom requirement
- Force control (Pick and Place with force control)
- Placement accuracy

ISO 9001
ISO 45001

- Automation solution in micro-handling and positioning
- Cleanroom and environment sensitive applications
- Automation and test development engineering
- Unwavering protection of intellectual property
- Proven equipment development track record
- Industrial standard compliance

* Design reviews with customers are conducted during and at the end of each phase.
